

## Status of Solar Incentives

Statewide Solar Incentive data

View state data and track the 'trigger tracker.'

[Read more...]

The California Solar Initiative program administrators released detailed program data on May 8, 2007.

The data can be found from a link within the statewide Trigger Tracker on the Center for Sustainable Energy (formerly SDREO) website.

Some statewide statistics from this data include:

- 916 applications since 1/1/2007, representing 88.8 MW
- 715 EPBB applications, 201 PBI
- 182 Applicants
- 120 Companies submitted 1 or 2 applications
- Average system costs (before incentive, after incentive):  
Less than 10kW - \$9.74 before incentive. \$7.28 after incentive  
Between 10kW and 100kW - \$8.25, \$5.54  
More than 100kW - \$7.98, \$4.67

[note: statistics reflect data available as of May 8, 2007 and only include applications after 1/1/2007]
